

ACKNOWLEDGMENTS

Our deepest thanks to the leaders and participants of the 2023 Summer Seminar in Composition Research at Dartmouth College. We will forever associate this manuscript with Butterfield Hall. Also, thanks to Dr. Sarah Wyatt of Ohio University for setting aside her much more important work of launching plants into space (no, really) so that she could teach us about rhizomes. We also thank the UMaine English MA students in the Spring 2023 offering of English 570 for reading and discussing these chapters.

DEDICATION

To Lindsey and Daniel for their patience and support.
