Masking Inequality with Good Intentions

In *Masking Inequality with Good Intentions*, Heather M. Falconer examines the impact of systemic bias on disciplinary discourse acquisition and identity development by asking “How do the norms and expectations of higher education and STEM, specifically, impact the development of scientific identity and discursive skill?” and “What role do societal markers like race and gender play in the negotiation of identity in STEM learning environments?”

Drawing on the experiences and writings of six students from historically underrepresented backgrounds in STEM, each participating in an undergraduate research program, Falconer discusses how programmatic and pedagogical choices can work to either further marginalize students and disrupt their writing and identity development as scientists or create counterspaces—spaces where students can thrive and push back against dominant, oppressive forces. Practical applications for pedagogy, curriculum, and program design are included.

**Heather M. Falconer** is Assistant Professor of Professional and Technical Writing at the University of Maine, Orono. She is a co-editor of the WAC Clearinghouse Perspectives on Writing book series, co-chair of the Research and Publications Committee of the Association for Writing Across the Curriculum, and a member of several editorial and regional boards. Her research focuses on the intersections of culture, discipline, and pedagogy, with an emphasis on creating inclusive educational spaces. Her work has appeared in journals including *Written Communication*, *The WAC Journal*, and the *Journal of Hispanic Higher Education*, as well in edited collections.

MASKING INEQUALITY WITH GOOD INTENTIONS

SYSTEMIC BIAS, COUNTERSPACES, AND DISCOURSE ACQUISITION IN STEM EDUCATION
The Practices & Possibilities Series addresses the full range of practices within the field of Writing Studies, including teaching, learning, research, and theory. From Richard E. Young’s taxonomy of “small genres” to Patricia Freitag Ericsson’s edited collection on sexual harassment in the academy to Jessie Borgman and Casey McArdle’s considerations of teaching online, the books in this series explore issues and ideas of interest to writers, teachers, researchers, and theorists who share an interest in improving existing practices and exploring new possibilities. The series includes both original and republished books. Works in the series are organized topically.

The WAC Clearinghouse and University Press of Colorado are collaborating so that these books will be widely available through free digital distribution and low-cost print editions. The publishers and the series editors are committed to the principle that knowledge should freely circulate and have embraced the use of technology to support open access to scholarly work.

Recent Books in the Series

Jessica Nastal, Mya Poe, and Christie Toth (Eds.), *Writing Placement in Two-Year Colleges: The Pursuit of Equity in Postsecondary Education* (2022)
