Vol. 3 No. 5   May 1985

Word Processing, Writing, Literature, and Linguistics
Annual Cumulative Bibliography

Bradford Morgan

The following bibliography is intended as a representative sampling of published articles rather than an all-inclusive compilation of research. In some cases, older research is included to identify pioneering efforts in the field. Though word processing in writing is the primary focus, relevant examples of computer applications to literature and linguistics are also included. Those researching the subject should also consult my all-different twelve-page "Annual Cumulative Bibliography" published in the May 1984 issue of the *Research in Word Processing Newsletter*. Most of these articles should be available through interlibrary loan.
