Word Processing, Electronic Research, and Desktop Publishing:
Annual Cumulative Bibliography

By Bradford A. Morgan
Word Processing, Electronic Research, and Desktop Publishing

Bradford Morgan

The following bibliography is intended as a representative sampling of published articles rather than an all-inclusive compilation of research. Entries reflect the larger environment in which a writer uses the computer to process words, including on-screen composing and editing, text analysis, database research, and font-oriented personal publishing which uses typesetting rather than typewriting as a model.

Those exploring the subject further should consult my two previous annual bibliographies published in the Research in Word Processing Newsletter: the 12-page “Annual Cumulative Bibliography” of May 1984 (Vol. 2. No. 5) and the 19-page “Word Processing, Writing, Literature, and Linguistics: Annual Cumulative Bibliography” of May 1985 (Vol. 3 No. 5). Each of the three bibliographies contains all-different entries, most of which are available through interlibrary loan.
