Chapter 12

Helping Doctoral Students of Education to Face Writing and Emotional Challenges in Identity Transition

Paula Carlino

Learning is particularly drenched in deep emotional issues, precisely because learning expands us beyond the secure realms of habit and prior senses of the self into new areas of competence and participation.

Who we are

	<p>The GICEOLEM, Group for Educational Quality and Inclusiveness by Taking Care of Reading and Writing in all Subjects ,</p> <p>is based on the <u>Linguistics Institute</u> of <u>Universidad de Buenos Aires</u>.</p>
---	--

Our multidisciplinary team comprises pedagogues, linguists, psychologists, a biologist, and a Math teacher. We study the relationships between teaching, learning, reading and writing in different disciplines at the secondary, higher education and postgraduate levels. [Read about our understanding of academic literacies](#)

Our main contribution attempts to show in what ways reading and writing can be dealt with and taught in context and meaningfully in all disciplines and levels of education, avoiding exercises that fragment and distort reading and writing practices.

Most of our members work with the [CONICET](#), the University of Buenos Aires and other national universities.

We are on [Twitter](#) and [Facebook](#)
